

Introhive for HubSpot

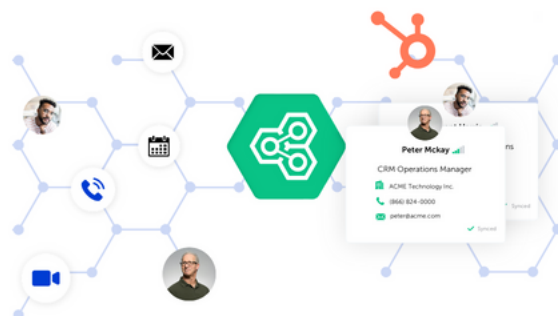

Automated Contact Capture and Enrichment

HubSpot is the cornerstone of client data, enabling data-driven decisions, collaboration, and enhanced Marketing and Business Development efficiency. However, traditional data entry methods are time-consuming, costly and reactive, while other solutions flood your CRM with irrelevant data – both impeding your ability to drive bottom line results.

Automatically Sync Contacts

Introhive for Hubspot improves productivity, ensures data accuracy and reliability by eliminating manual contact entry. Seamlessly identify and sync the contacts that meet your unique business needs utilizing a configurable rules based engine.
